## **Details**

This aFe Stage 2 cold air intake produces 18hp, 22lbs. x ft. of torque and outflows the factory intake by 47%. Enclosed in a durable 16-gauge, powder-coated heat shield; this air intake system features a washable/reusable conical air filter that improves airflow for increased horsepower and torque. This intake system also features a maintenance-free polished tube that replaces the stock intake tract and directs increased air flow with improved volumetric efficiency for maximum performance. One-piece heat shield requires little or no assembly and the filter is constructed with 100% polyurethane for long life and multiple cleaning cycles. This system mounts to the factory lower intake housing for a hassle-free installation.

### **5-1/2" Conical Filter with Inverted Top**

- This intake utilizes a huge, 5-1/2" oval conical Pro DRY S performance air filter with inverted top for maximum flow. This 3-layer progressive, non-oiled synthetic air filter provides maximum convenience. - aFe developed this heat shield to snap onto the top of the lower
